There's one thing you should know about me.
I specialise in a very specific type of change - subconscious change.

For the past ten years, I have earned my living stepping inside people's heads. They say that humans use less than 5% of the brain, the unconscious mind however can use infinite amounts.

Within the first 3 minutes of me meeting someone, they will leak more unconscious information to me through their body posture, language and lots of other ways than they will ever know or realize.

It is through the information they give me that allows me to navigate the architecture of the mind, you see, the mind cannot distinguish between things real and imagined, this is where amazing powerful changes can occur.

It's not what happens to us in life, it's how we see it, once there, I gain an understanding how you are processing a specific situation or issue. Through my own unique methods developed over many years, you can make changes in minutes that last a lifetime. I know because I have trained thousands of people how to achieve their dreams and seen miraculous things happen.

Would you like to be powerfully confident?

How would it be if you could overcome fears and phobias in minutes you have held for decades? Give powerful and enigmatic presentations like some of the world's most charismatic people.

Learn powerful skills of unconscious rapport building together with influence and persuasion that will skyrocket your results to a whole different level.

Let me teach you how to ignite your passion, motivation and the belief in yourself to achieve whatever you want. Discover the art and science of micro expressions, the psychology behind spotting when others are lying to you. I can show you all of the secrets that until now have only been available to the powerfully rich.

I look forward to you meeting yourself soon.

Darren Stanton.

SERVICES INFLUENCE & PERSUASION

Darren performs on stage all over the UK and has trained thousands of people to achieve success. When Darren appears in the media, he understands his success depends wholly on his ability to communicate deeply and effectively with clients and an audience.

During the 2010 General Election in the United Kingdom, Darren was called upon by the media to offer his analysis of the body language and communication style of the three party leaders during the televised electoral debates. Their success rested on their ability to communicate their message to the country and this played an instrumental part in the outcome of the election.

Like politicians, the difference that makes the difference between total success and mediocrity is your ability to connect with your listener. Try this, think about the last time you met someone or maybe saw a public figure in person, on stage or television, and they struck you as being a totally magnetic or charismatic figure and were totally awe inspiring? Maybe it was their voice, or the confidence they were showing? And you thought it must be fantastic to be able to communicate like that? Do you think they were born like it?

Do you think it is an accident, It was no accident, that ability to connect with you is the result of thinking and behaving in a certain way.

Perhaps you are in the position in your job or business where your success depends on your ability to communicate very well and need to enhance your skills such as sales, management, law or just a desire to learn new skills and meet other like minded people. Perhaps, you have an important interview or presentation or something else looming and you want to ensure success.

Communicating with passion is not about a set of uncomfortable robotic stages being afraid to fold your arms or standing in a certain way as we have seen some trainers teach, it is about being comfortable in your own skin, being yourself but adopting new ways of thinking about things.

Scientists have discovered that during any 10 minute conversation the average person tells at least 3 lies.
